Looking to the future with the knowledge of the past: Bongio has been producing tap and bathroom fitting collections since 1936. Quality, design, research and innovation are the basis for all the planning and production. High standards are guaranteed by the craftsmanship, love for technology, quality materials, and the products being finished and checked by us & every single item really furnishes the bathroom. 60% of the production is destined for the most demanding foreign markets - Bongio has won a prestigious place the world over, where Italian design has always been considered the number one for good taste and elegance. Thanks to more than seventy five years of experience and working together with the architects and designers, Bongio gives the bathroom the personality and character that the most intimate room in the house deserves.

During a century, like our one, where the water is becoming precious than gold, bongio promotes the campaign "I LOVE WATER", wishing to push the culture of the water saving as a fundamental duty every of a Citizen. It is to follow this philosophy, that bongio has started a series of particular actions. That all the bongio mixers & showers will have a particular device that will reduce the flow of the water without limiting the functionality and the design, but granting to have an important energetic and economic save. Moreover following the same philosophy, bongio will support a water project to build new wells of water for the African population, financing the AMREF Association, believing that also our historical customers and the new ones can appreciate the choice.

To be updating about the initiative, please visit our web site: **[www.bongio.it](http://www.bongio.it)**

**Soffi**

design . Massimiliano Della Monaca  
engineering . Studio Tecnico Bongio

*With its deep sense of style and product culture, Bongio introduces the elegant SOFFI collection, a complete line of taps and fittings that extols the noblest spirit of authentic Murano glass, certified by the Consorzio Promovetro as “Murano Artistic Glass.”*

**Soffi**

Design Massimiliano Della Monaca  
Engineering Studio Tecnico Bongio

*The calm and wisdom of the finest handicrafts, pure and unimpaired over the years, incorruptible by changing fashion, an example of perfection envied the world over. Unique, eloquent pieces, capable of refined and harmonious dialogue with any bathroom, a distinctive stylistic code embellishing the space with our most intimate feelings. Finally, design recovers the loftiest contents in terms of research, materials, and function, leaving behind commonplace self-congratulation in conflict with modern customs. Polished or opaque, hammered or smooth, inflected with fascinating colours, the Murano glass in the Soffi*

*collection is an unmistakeable touch of style with high artistic and design content. Because designer Massimiliano Della Monaca has merged all of his expertise in designing luxury taps and fittings with his passion for traditional Murano glass production. A combination that celebrates a new way of looking at bathroom taps and fittings, transverse in style and content, able to delight the most refined tastes. It is no coincidence that Bongio has led the way in creativity and innovation for over 70 years: an ambassador of authentic Italian quality esteemed all over the world.*

The new size of pleasure

## ON - NATURAL BRASS

Natural finiture of the raw brass that during the time and in contact with the air, it will change the tonality, becoming more dark over the surfaces of less contact.

## CR - CHROME

It is the most required finiture with a mirror surface. Our higher thickness of chrome grants higher resistance.

## CS - MATT CHROME

Matt chromed galvanic finiture, pleasant to touch, high resistance and very nice for the modern collections.

## PL - PLATINUM

Brushed chromed galvanic finiture, obtained through a manual brushing, with the final effect of the brushed stainless steel.

## NI - LIGHT NIKEL

Finiture very similar to the chrome but more warm. At the beginning you have a mirror yellow surface. Then the time and the air change to a silver tonality.

## NS - BRUSHED NIKEL

Brushed finiture of the am glossy one. It is similar to the platinum but more warm. This could be ideal for both modern and classical collections.

## OR - GOLD

Galvanic finiture obtained by 24 kt gold electrolytic processing.

## OP - BRUSHED GOLD

Manual brushing made on the am gold finiture. This has suggested for the modern collections.

## FA - OLD IRON

Galvanic finiture obtained by the deposit of different metallic finitures, one over the other, plus a manual brushing and a final application of a matt varnish to maintain the old 'effect' during the time. This finiture it is the best for the classic collections.

## BR - BRONZE

Galvanic finiture obtained by a manual brushing that evidences the dark and clear metallic reflections, covered then by a transparent varnish. This finiture it is the best for the classic collections.

## RA - OLD COPPER

Galvanic finiture obtained through a manual brushing that evidences the metallic tonality of different kind of copper and recovered by a transparent varnish.

## AG - OLD SILVER

Galvanic finiture obtained through a manual brushing and recovered by a transparent varnish. This finiture is similar to the tonality of the pewter and it has suggested for the classical collections.

## TT - TUSCANY BRONZE

Galvanic finiture obtained through more phases, from a manual brushing to a particular polishing. Using a special glossy cream, we obtain the effect of an old finiture. This finiture could oxidized in the time over the parts of most contacts.

## RB - ORB (OIL RUBBED BRONZE)

Deep dark brown tonality for this finiture obtained by powder and then covered by a matt paint.

## NE - MATT BLACK

Deep black tonality for this finiture obtained by powder and then covered by a matt paint.

## BI - MATT WHITE

White tonality for this finiture obtained by powder and then covered by a matt paint.

## BL - WHITE GLOSS

Glossy white for this finiture obtained by powder and then covered by glossy paint.
